Staff 10 people Children 44 people

~Philosophy~

contributing to children's happiness and area's development

○ Favorite motto and commitment to work

We enjoy working" is our slogan, and we spend everyday life chcheerfully with a smile.

○ Commitment to institution

This is the old garden building built 40 years ago, but we manage it so that children can stay safely with their barefoot.

○ What impressed you, what you were happy, what made you think, and so on while you attended to children

We look back ourselves seeing children's figures by sharing joy when they become able to do what they couldn't until the other day with the children, and by being impressed by children's figures they try to talk to another children who have troubles.

○ If you have an episode when you had to do with foreigners in the kindergarten life, please tell us about it.

We've temporarily taken care of a child whose foreign family has a maternal parents' home in our kindergarten's area when the family went home in summer.

We worried about difference of languages and cultures, but children could accept it without feeling uncomfortable too, so we could make good memories.

Since then, we took care of their children every time they go home, and children in our kindergarten could gain an opportunity they experience

landscape around the kindergarten

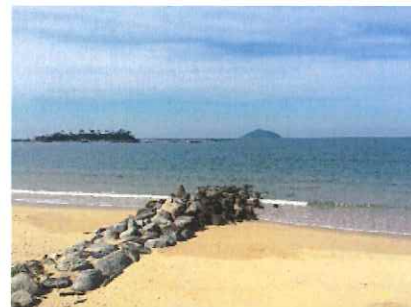

different culture, and make good memory.

○ How to live with corona virus (What changed such as the flow of the day)

Because of state of emergency last April, we had no choice but to ask for self-restraint to go to the kindergarten for about one month, so we might make some parents worried and troubled.

After reopening the kindergarten, we couldn't help canceling and reducing many events and entertainment, so we made children feel very sad.

Now, We cooperate with all staffs so that children can spend everyday life as ordinary as possible being thorough management such as disinfection.

Sapling planting of cherry blossoms at Maebaru sewage management center

“Protecting and growing Itoshima’s nature” environmental protection projects part2

March 6th

In this day, 31 members in the association planted 30 sapling of "someiyoshino" inside the ground of Maebaru sewage management center to wish that global warming will stop and the place will become famous with Itoshima rotary club.

80% cherry blossoms in Japan are called "someiyoshino" and it is said that the best time to see them will be after 10 years.

By imaging that saplings of cherry blossoms will reach best time lovely, we felt as if our hearts tired with corona vortex would be healed.
