Opening Remarks

This year, new corona virus has been prevalent all over the world, so Japan made state of emergency and made efforts to infection spread prevention. Specifically, infection prevention measures, such as close of school, restriction of facilities many people gather, refraining from unnecessary non urgent going out, request for shortening opening time of restaurants, and immigration restrictions of foreigners were done. These countermeasures affect civil lives and social activities largely.

At our association, events planned this year, such as curry buffet, flowing somen, and class of cooking in the world were all called off to avoid dense.

Also, delivery courses (NEXT 50 enterprises) international students come to elementary schools were canceled because schools get time of classes.

Our association focused on membership expansion business which could be done under this condition as this year's important business, and directors, officers did it mainly. Now last of February, 104 individual· family members, 104 office· organization members joined newly.

It's not clear whether corona virus will converge next year, we expect effect of vaccination, and wish that we could spend ordinary lives and social activities.

Chief Director Tanaka Yozo

Contents

p2 Hello, "Ms. Chiang Chia-Chien"
